

Check out this beauty!

Local detectorist Hugh Vincent found this recently in our village. His best guess at this stage is that it is late medieval (1250-1500) and possibly some sort of dress adornment. Could the face be that of a leopard or some other big cat? Or the Green Man? It is made of silver gilt (silver with a gold covering). Its monetary value is not yet known but it looks pretty priceless to us!
